IAPR

The **10th International Conference on Pattern Recognition Systems (ICPRS-19)** is an annual event that follows ICPRS-18, ICPRS-17 and ICPRS-16, a continuation of the successful Chilean Conference on Pattern Recognition that reached its 6th edition in 2014. In 2019 it is organised by the Université de Tours (France) and the Chilean Association for Pattern Recognition (AChiRP, a member of the IAPR) and it is endorsed by the **IAPR** and sponsored by the Vision and Imaging Professional Network of the **Institution of Engineering and Technology (IET)**, who will publish its proceedings (provided that at least one author registers and presents the work at the conference). Papers deemed to be of the required standard and presented at the conference, will be indexed by INSPEC and, normally through it, **IEEE Xplore** and **Scopus**. All paper submissions need to be submitted via Conftool to be peer-reviewed by an international panel of experts. Excellent papers will be encouraged to submit extended versions for consideration in JCR-indexed journals (IET's Biometrics, Computer Vision and Image Processing journals). For more information, please see http://www.icprs.org. There will be a good set of keynote talks.
